- Mya Souvanna, Front-End Developer/Web Developer

Our Client & Their Needs

Our Client:

Lisa Duet, Director of Jasper Advertising and Promotions Commission (JAPC)

About JAPC:

A group of 8 members created in 2021 to promote and plan events for the city of Jasper, Arkansas

Current Website Issues:

- **Don't have their own website (apart of the City Of Jasper website)**
  - ○ **With no control over this website, they're only allowed to make changes once a month**
  - ○ **This causes problems since events can change at any time**

Their Needs:

- **To have an easy-to-use website that JAPC has complete control over**
- **To have an interactive website that aims to inform Jasper residents and visiting tourists about ongoing events occurring in Jasper, Arkansas**
- **To gather and store information about contacts in a database**
